

Scenario: You are a student at the University of South Carolina who has recently been moved into quarantine. You have celiac disease and cannot eat gluten. You have downloaded the UofSC Quarantine Meal Planner in hopes of customizing your meals to your gluten-free needs.

Tasks:

1. Log in to the app and change the meal overview from today (10/24) to tomorrow (10/25).
2. Change tomorrow's (10/25) main breakfast course from waffles to oatmeal and the drink from water to coffee.
3. Leave feedback on your experience. You want to leave 4 stars and a comment: "I didn't love the choices that I had for today's breakfast main course".

Things to fix:

1. The student should have to log in before being able to leave feedback.
2. There needs to be a back button added to the feedback page.

Things to not change:

1. The dropdown of dates with two days in advance on the three-meals overview screen.
2. Formatting of the meal overview with radio buttons.
