This is Julia. She made the mistake of going out with her friends in a pandemic and not wearing a mask. She then started to not feel well.

Julia started to not feel well and went and got tested for COVID. Unfortunately, her test came back positive. She was moved to quarantine.

Julia had to pack quickly before being moved to quarantine, and she couldn't bring any food with her. The meals they bring her don't meet her dietary and allergy restrictions so many days she has not been able to eat as she tries to get better.

Julia is texting her friends complaining about her food, but they can't do anything to help as they are all also quarantined!

One of her friends tells her about the Carolina Quarantine Communications app and she downloads it, giving her the power to tell the people cooking and delivering her meals about her dietary needs.

They are able to deliver meals to Julia that she can eat and she starts feeling better fast and survives her quarantine feeling good as new.

Naomi Lee has a lot of in-person classes this semester. She is really paranoid about the pandemic, so she tries to stay safe and always wears a mask. Unfortunately, her friend in her Chemistry lab tested positive for coronavirus. Naomi went to get tested and found out she is positive as well. Now, she must quarantine for two weeks.

Naomi is a vegan, and the food she is receiving is awful. She keeps getting unhealthy meat options that do not fit with her lifestyle choices.

Naomi texts her friends to bring her food, but, unfortunately, they are out of town and her roommate is quarantined as well.

Later, Naomi finds out about an app that delivers meals to quarantined students on UofSC's website. Naomi looks into the app and sees that there are many vegan options that fit her needs!

Naomi looks on the app and sees that she can get meals delivered a maximum of three times a day. She is able to get the food of her choice delivered when she wants it.

Naomi is so happy to be able to use her meal swipes on some healthy meals while quarantined. Her vegan meals are making her quarantine experience better!
